Is the custom of giving the name of any natural object to a man or woman common, and on the death of the person so named is the word disused and another substituted to indicate such natural object?—It is not the custom here.

Such a custom, it is said, leads to great alterations in the language ; are there any other obvious causes in operation leading to changes in the names of things?—None.

NOTE.—So far as I can learn, they use no generic terms, the application being wholly individual—unless in the case of fish, which here is generally called “*Munjey*,” or “*Mungi*.”

GEORGE HOUSTON, Gunbower Station, Durham Ox.
