Anyhow, I started on my journey down the river with a dug-out canoe to look for a good spear. When I reached the island I had to go into the jungle to look for the spear. In the thick part of the jungle I saw a straight spear which I immediately cut down. Then I made my way to camp. When I got there I started to gather sticks to make a fire. The fire was blazing up making black smoke, into which I put the spear to take the skin off. After I'd taken the skin off I took it out for drying in the sun. Then I had to put wires in the spear and tie it up with strings which are carefully made by the women.

When I had finished making my spear I made my way home with the dug-out canoe.
